

Townsend's ultra lightweight, low profile carbon graphite Premier Reliever provides unloading and pain relief for patients who have unicompartment OA. The Premier Reliever, our #1 selling OA brace, features rigid shells and Townsend's patented hinge motion, suspension and rotation control technology. Our exclusive Loadshifter Relief Mechanism allows you to dial in the ideal corrective force to optimize unloading and patient comfort.

Potential Users

- Patients diagnosed with mild to severe medial or lateral OA
- Patients who have unicompartment OA combined with knee instability

Models and Fabrication Options

Premier Reliever OA knee braces are custom fabricated from a cast mold, digital leg scan or leg tracing. Ordering options include:

- Optional double band tibia shell
- 14, 15 or 16 inch length
- Five textured powdercoat finishes; optional high gloss and custom paint colors

Patented Townsend Motion Hinge Options

- TM5 Hinges: Adjustable extension stops
- TM5+ Hinges: Adjustable extension and flexion stops
- Four Bar Hinges: Includes telescoping condylar pad

Patented ultra-low profile TM5 Townsend Motion Hinges

TM5 and TM5+ hinges available in aircraft aluminum, titanium or stainless steel.

Warranty

Six month initial fit warranty (the brace can be returned for free fitting adjustments or remake). Under normal use and conditions, Townsend provides a lifetime warranty (free repair or replacement) if the hinges or shells fail. Straps, chafes, hinge covers and other accessory parts are covered by a six month warranty.

Casting Protocol

1. Cast non-weight bearing, full extension. Cast length must exceed the brace length by a minimum of one inch at each end.
2. Apply stockinette and place a cutting strip or tubing down the posterior aspect of the leg. Mark all landmarks with indelible pencil.
3. Use adequate layers of plaster or synthetic casting material to ensure rigidity. Lightly compress the M-L dimensions of the patient's leg.
4. Do not apply correction to cast.
5. Write the patient's name and your office phone number on the cast. Let the cast dry adequately to avoid distortion during shipping.

Premier Reliever OA knee braces are fabricated with Townsend's patented Synergistic Suspension Strap which decreases the potential for brace migration.

Townsend Premier Reliever OA Unloading Knee Brace

Casts: 18-20 inch length; full extension; non-weight bearing, foot dorsiflexed; quad relaxed; landmarks indicated; cut off back of the leg.
