Trulife Lower Limb Systems

BEST VALUE | TESTED | TRUSTED | PREFERRED

Jay Humphries is Trulife's very own engineer who is at the cutting edge of product development in prosthetics. He's also a war veteran, a double amputee and an experienced sky diver, and he personally tests new products.

Zenith and Zenith LP Lower Limb System ^{K3/K4}

- Highly dynamic and functional system that delivers incomparable performance
- Zenith foot features four resistance options at heel strike for patient fine-tuning
- Sandal-toe foot shell and Spectra sock included with foot
- Zenith is featured on page 12

Indications: Medium to high impact levels, K3-K4

Zenith and Zenith LP K3/K4

Revolutionary maintenance-free design delivering incomparable performance.

"Zenith is my favorite foot that I've EVER tried! It is far superior to any foot I've ever owned. Trulife knocked it out of the park with Zenith!"

– Pete McAfee

"My patient loved Zenith. He was getting perfect rollover, said his limb pain went down. He was able to run, walk fast. Really easy fitting."

– Bryan Roehr (Cornerstone P&O, Edmonds, WA)

"You always hear the phrase 'improved quality of life'. This foot has literally done that for me."

– Pete McAfee

NEW!

Maintenance-free design

Lightweight aerospace composite materials for increased comfort and reduced fatigue

Urethane bumper with four resistance options at heel strike for individual patient fine-tuning

Energetic, flexible toe loading response that automatically adjusts to variable walking speeds

Full-length sandal-toe ensures superior ground compliance to facilitate a well-balanced gait

Lightweight Z-pins to deliver increased structural integrity at keel/shank merge point

Pete McAfee

Professional FreeRide jet skier, avid downhill skier and hiker

SKC303	Replacement Foot Shell, Dark	22-30 cm	N/A

Category Selection Instructions

The Trulife Zenith foot has three available category options. Each is designed and tested to support a specific weight and impact level combination. To optimize the selection and ensure amputee's safety, follow the two steps below to determine the appropriate category.

1. Locate the column that corresponds with the amputee's impact level.
2. Within the selected column, locate the amputee's weight.

Important Note: If the amputee has a long BK, carries heavy loads or will reach a higher impact level within a year, choose the next category higher.

Warning: Choosing a lower strength category than what is suggested based on the above procedure and patient data will void the warranty. If your patient's weight exceeds the limits of the chart please call Trulife Customer Service.

	Medium	Medium-High	High

Category Selection Instructions

To optimize the selection and ensure amputee's safety, follow the two steps below to determine the appropriate keel.

1. Locate the column that corresponds with the amputee's impact level.
2. Within the selected column, locate the amputee's weight.

Important Note: If the amputee has a long BK, carries heavy loads or will reach a higher impact level within a year, choose the next category higher.

Warning: Choosing a lower strength category than what is suggested based on the above procedure and patient data will void the warranty. If your patient's weight exceeds the limits of the chart, please browse the catalog for other foot options or call Trulife Customer Service.

SKC303	 Replacement Foot Shell, Dark	22-30 cm	N/A

Specifications

Weight Limit	160 kg / 350 lb*
Product Sizes	22-30 cm
Toe	Sandal Toe
Foot Shell	Light, Dark
Product Weight	590 g / 1.30 lb (Size 27 without Pylon)
Min. Clearance	7 cm / 2.9 in
Heel Rise	9.5 mm / 3/8 in
Warranty Foot: Foot Shell:	2 years 6 months
Includes	Female Pylon (AAA200)
Made in USA	

*For category #5

Bumper Selection Instructions

To optimize selection, follow the three steps below to determine the appropriate category.

1. Locate the column associated with the amputee's foot length.
2. Locate the row corresponding to the amputee's weight.
3. The area where the column and row intersect lists the appropriate category.

Important Note: If the amputee has a long BK or carries heavy loads choose the next category higher.

Warning: Choosing a lower category than what is suggested based on the above procedure and patient data will void the warranty. If your patient's weight exceeds the limits of the chart, please browse the catalog for other foot options or call Trulife Customer Service.

Foot Length	22	23	24	25	26	27	28	29	30
Weight

Select Stance Flexion Knee

- Polycentric, pneumatic 5-bar knee
- 9° of adjustable stance flexion
- Shock absorption at heel strike
- Independently adjustable pneumatic flexion and extension control
- Available with built-in proximal pyramid or threaded adapter
- Equipped with a built-in knee cap, preventing clothing from getting caught in the mechanism

Indications:

SSK615: Above knee amputation, medium to high impact level, K3-K4, maximum weight of 100 kg / 220 lb

SSK615-THR: Above knee amputation, medium to high impact level, K3-K4, maximum weight of 125 kg / 275 lb

*Includes set screws. **Includes mounting screws. ***Includes clamp screw.

The Do's and Don'ts of AAA Application/Use

Manufactured with shot peened aluminum for improved durability and strength.

Do

- ✓ Perform an annual check for signs of corrosion and verify fastener torque
- ✓ Follow correct tightening sequence
- ✓ Apply tightening torque before the recommended Loctite 242 cures
- ✓ Tighten ALL set screws to the specified torque value
- ✓ Apply fastener tightening torque slowly and methodically
- ✓ Tighten the clamp screw first, before the four mounting screws on the rotatable flange
- ✓ Use the correct and properly calibrated torque wrench
- ✓ Ensure the mating components are clean and free of foreign objects
- ✓ Seal the prosthesis if the patient's activities may subject the prosthesis to immersion
- ✓ Use only fasteners provided by Trulife and that are specified for a particular adapter
- ✓ Instruct patient to not make adjustments or alignment changes

Don't

- ✗ Assemble the adapter to a component with incompatible geometry
- ✗ Exceed the recommended fastener tightening torque range
- ✗ Use stainless steel fasteners with AAA components
- ✗ Mount any aluminum component directly against a carbon fiber component
- ✗ Use a torque wrench that has been misused or abused
- ✗ Use components with a male pyramid stud component constructed of softer materials such as aluminum
- ✗ Allow fluids to accumulate and dwell inside a prosthetic assembly
- ✗ Expose adapters to corrosive fluids: water, salt water, chlorinated water, ammonia, acids
- ✗ Exceed the load rating of the device, i.e. body weight plus additional loads that the patient might lift, push or carry
- ✗ Subject the adapters to severe impact

"I have been designing, testing, and re-designing various modular adapters, prosthetic foot components and prosthetic knee components since 2002. All new designs and newly re-designed components were thoroughly tested and pushed to the limit so as to learn the amount of punishment these devices can withstand. Good design practices coupled with the application of well-established manufacturing processes allow us to offer our AAA line of aluminum modular adapters with a higher weight limit. They meet or even exceed the strength and durability of legacy titanium and stainless steel adapters."

— Jay Humphries, Trulife Engineer

Green Dot Total Contact Suction Socket Valve

- Reliable seal
- Lightweight design

Indications: Transfemoral amputees who use thermoformed sockets

Selection

Model No.	Description
P12-310-1000	Green Dot Total Contact Suction Socket Valve, Plastic, Manual Expulsion

SEF132	 Child's Play Energy, Light Foot Shell	13-21 cm	65 kg / 144 lb*
SEF144	 Child's Play Energy, Dark Foot Shell	13-21 cm	65 kg / 144 lb*

Keel Selection Instructions

To determine which keel is appropriate for your patient, check the below table for keel availability by foot size. Please note that sizes 13-15 feet do not have sandal toe foot shells.

Important Note: Choose the next higher keel level if your patient has a long BK limb, regularly carries heavy loads, or is at the upper limit for weight or impact level.

Warning: Choosing a lower strength category than what is suggested based on the above procedure and patient data will void the warranty. If your patient's weight exceeds the limits of the chart please call Trulife Customer Service or your Territory Manager.

Weight Limit	Keel	Foot Length									
		13	14	15	16	17	18	19	20	21

Note: Warranty durations begin the date of installation, repair or refurbish.

Trulife warrants each of its prosthetic devices subject to conditions below, to be free from defects in material and workmanship under normal use, service, and proper installation, for the time period specified below:

If failure of a purchased product occurs during this period because of a defect in material or workmanship, upon satisfaction of the conditions set forth below, Trulife will replace, repair, or refund the product at no charge to the original retail purchaser.

Your sole and exclusive remedy, as the original retail purchaser, in the event of a defect is found, is expressly limited to replacement or repair of the product, although Trulife may elect to refund, not to exceed the purchase price, rather than replace or repair the product. Replacement products are warranted for only the remainder of the original warranty period. Warranty is nontransferable and may only be exercised by the original purchaser.

The limited warranty contained herein is in lieu of all other written or expressed warranties. Any implied warranty, including the implied warranties of merchantability or fitness for a particular purpose, is limited in length to the duration of this limited warranty. Some states do not allow limitation on how long an implied warranty lasts, so the above limitation may not apply to you.

Trulife's sole responsibility is to replace, repair, or refund as stated herein, and Trulife shall not be liable for any special, indirect, or consequential damages including loss of time, inconvenience, loss of the use of the product, or commercial losses. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

The application guidelines for this Trulife product are for the use of and by certified, qualified practitioner only. Patients are not to attempt to apply or adjust the item unless expressly instructed to do so by the practitioner responsible for the prescription and/or initial fitting of the device. All patient questions should be referred to the practitioner and not to the manufacturer. The manufacturer warrants only that the enclosed product has been inspected for quality and can be effective for certain indications, but final decisions and ongoing monitoring must be made by the prosthetic professional(s) prescribing and/or fitting the device to determine its effectiveness for an individual patient. Patient compliance is an integral part of the entire protocol and must be adhered to in order to avoid potential problems and to maximize the effectiveness of the prescribed product.

As a condition of the sale of any Trulife product, this prosthesis is restricted to a "Single Patient Use Only" by the originally fitted patient in order to protect the care provider and the patient against potentially adverse consequences of infectious disease transmission, material instability in adapting to the configuration of the original user and/or decrease in effectivity. Any express or implied warranties are voided if the product is reused or fitted to another patient. Additionally, a license of right to use under any relevant patents pertaining to the product is terminated with the cessation of use by the original patient. As with all Trulife products, this product must be prescribed and applied by a qualified practitioner to determine it meets the needs of the particular patient and accomplishes the desired results.
